

The first wireable IP65 Outdoor lighting system.

Create your own water, rain and storm resistant lighting solution.

Patented Solution

Water has never been a natural environment for light.
Until today.

EIVA SYSTEM

IP65: Water and rain resistant

The heart of EIVA is the world's first wired E27 IP65 lamp holder: thanks to the insulating gel inside and a watertight membrane on the bulb, this lamp holder withstands rain and storms in complete safety.

Designed for outdoor, perfect for indoor.

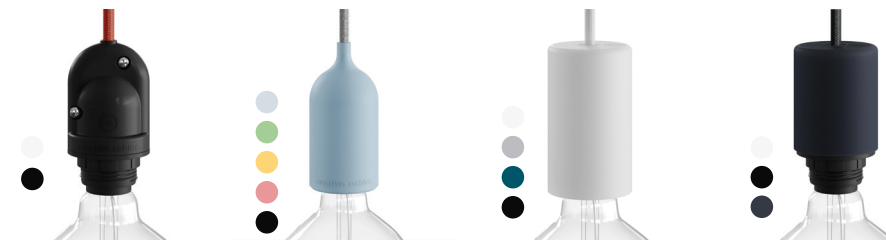

The EIVA lighting system is designed, engineered and patented by Creative-Cables to allow you to illuminate outdoor spaces like gardens, patios and terraces but is also an excellent solution for bathrooms, SPAs, and other indoor areas exposed to humidity.

EIVA COMPONENTS

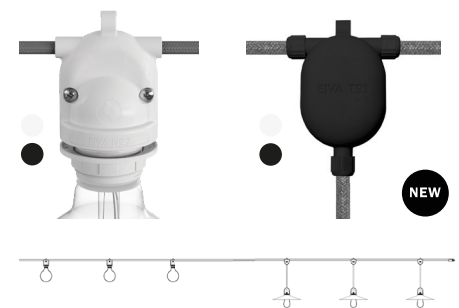

Lampholders

Configure your EIVA system by choosing the components that best suit your needs. IP65 single entry lamp holders can be purchased naked or with a soft touch silicone cover: perfect for single pendants or wall lamps.

Multiple input components

The multiple entry IP65 components (Eiva 2 and Eiva T01) allow to create solutions with several light sources, distributed over a wide range and connected by an EIVA cable.

Ceiling roses and plugs

The IP65 soft-touch silicone ceiling rose and the IP44 plug will allow you to complete your lighting using a wall/ceiling connection or a socket.

OUTDOOR EIVA CABLES

Fabric Cables

Designed for the EIVA waterproof lighting system, all of our fabric cables are made in Italy.

Specifications:

H05RN-F 300/500VAC 2x1mm²
Rubber sheathed flexible round IMQ-HAR Cable DOUBLE INSULATION under textile braid.
Standard reference: EN 50525-2-11, Low Voltage European Directive No. 2014/35/EU.

The cable is sold by the meter, multiple orders will be delivered in one piece up to a maximum of 50 meters in length.

MADE IN ITALY

What does UV resistant cable mean?

It means the fabric used to line these cables was designed to resist UV rays, which make up around 10% of sunlight. The colour of UV resistant cables remains vibrant and doesn't tend to fade over time, even when they are consistently exposed to sunlight.

EIVA LAMPS

With EIVA lamps you can finally change the look of your outdoor spaces with the safety of a water resistant product which is Made in Italy. The soft touch silicone finishes and matching cable are perfect to re-create an elegant and contemporary design in your outdoor spaces, lighting pergolas and gazebos. Choose among the available versions the one that best suits your needs: with lampshade, for exposed light bulb, suspended, plug-in or wall fixed and enjoy your outdoor spaces!

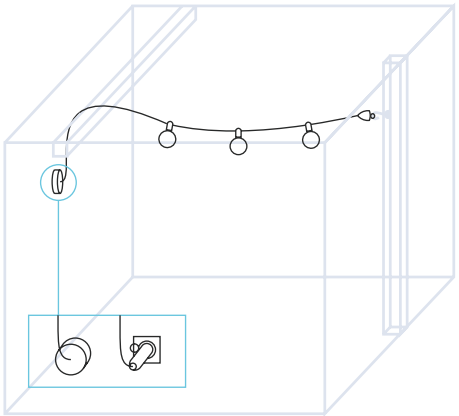

Thanks to EIVA products, you can transform the look of your outdoor spaces with the assurance of **Made in Italy quality, suitable for wet locations, making them compatible with the US market.**

MARINA LAMPS

Marina is more than just a string light — it's a blank canvas for your outdoor lighting ideas. Its light sources, connected by cables in sea-inspired colours — starfish red, olive green, and sandy white — create a refined, immersive ribbon of light. Ideal for gardens, terraces, poolside areas, or for setting the scene at unforgettable events and installations.

MARINA CONFIGURATIONS

Available in linear layouts with 3, 6, or 12 light points, or in grid configurations with 7 light points, Marina is fully customisable on request and designed to adapt to any setting. Whether you're furnishing a terrace, a garden or a hospitality area, we can create bespoke versions upon request — tailored in length, layout and number of light points (upon a maximum of 12).
